Strawberries From Egypt

Bringing you strawberries with full traceability from the field to your freezer – with the highest quality, hygiene, safety, sustainability and specification standards in the market.

The Best of Nature, Frozen in Time

We work very closely with one partner in Egypt, whose state-of-the-art processing facility is certified to our uncompromising high standards. Due to full traceability to large plantations, we can guarantee zero tolerance on exceeding pesticide residue limits for the USA market. We also have full control and analyses on Hepatitis-A, Norovirus, and heavy metals.

Controlled Supply Chain

CONTROLLED FIELDS

By using large controlled FDA-, EU-and UK-approved fields, we can ensure 100% traceability for every single strawberry.

DECAPPING STATION

After picking the strawberries, they're transported in plastic boxes to the hermetically closed and cooled decapping station, where the calyx is removed.

ROAD TO THE PROCESSING FACILITY

A protected and cooled vehicle takes the strawberries the short distance from the decapping station to the processing facility.

PRE-COOLING CHAMBER

When the load of strawberries arrives from the field, it is placed in a pre-cooling chamber to retain its freshness

PROCESSING FACILITY

The fully certified, state-of-the-art production facility was built in 2019 with the newest technologies.

ANALYSES IN THE LAB

Since batches are produced from the same large fields, our chemical and microbiological analyses are representative for the whole batch.

Controlled Farms

By working with three large plantations in Egypt which all have controlled fields with different spray programs dedicated for USA (FDA), EU, and UK, we guarantee complete traceability for every batch of strawberries.

State-of-the-Art Processing Facility

Built in 2019, our Egyptian partner's processing facility is one of the biggest frozen fruit and vegetable factories in the Middle East. The facility is BRCGS certified and meets the highest quality standards in the market.

IQF Strawberry Offerings

**WHOLE STRAWBERRIES,
UNCALIBRATED**

WHOLE STRAWBERRIES, 15-25MM

WHOLE STRAWBERRIES, 25-35MM

HALVES
