

LET'S HARVEST YOUR POTENTIAL.

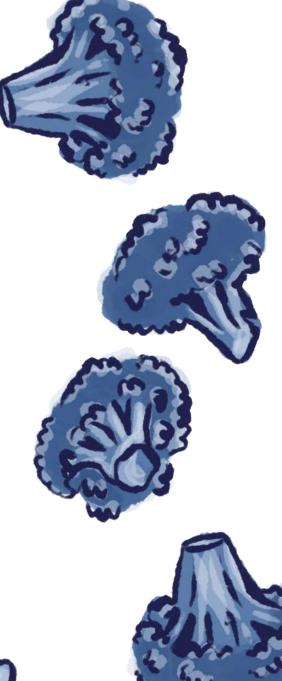

Excellence That Starts on the Farm

We have long term, multi-generational partnerships with our farms, and any new growers we onboard go through extensive research and vetting to ensure the highest quality and standards, resulting in better tasting, safer produce that you and your customers can feel good about.

Our Processing Facilities

SonderJansen owns our own manufacturing facility in Serbia, and utilizes a strong network of long-standing processing partners all across Europe, as well as in Egypt and Peru, that meet our superior quality and safety standards. This allows us to provide the highest quality fruits and vegetables. It also enables us to respond to your individual needs and challenges, whether it be more of a certain product or to fill the gaps of another supplier. It also means cost savings for our customers.

Leading IQF Innovation with the Highest Standards

We uphold the most stringent quality, hygiene, safety and specification standards in the market to deliver A-grade products to our customers, using as little pesticides as possible. All of our production facilities are GFSI certified and FDA approved.

At the Forefront of Sustainability

Sustainability has been a mandate for European companies for years, and that mandate is starting to rise in importance in the U.S. At SonderJansen, we have long been frontrunners of sustainability, and are working quickly towards carbon neutrality on our farms in our operations.

We are aligned with EcoVadis, the largest and most trusted provider of business sustainability ratings, which considers Environment, Labor & Human Rights, Ethics and Sustainable Procurement to accelerate positive impact on our planet and society. We're aiming for platinum status this year.
